Education

SRM Institute of Science and Technology — ***Chennai, India***
September 2020 - October 2024

- *B.Tech in Computer Science and Engineering.*
- *CGPA: **9.34 (93.4%)**.*
- *Relevant coursework: Software Engineering, AI, DSA, OOPS, DBMS, Applied programming, Analysis of algorithms.*

Experience

Data Science Intern

LOR Link

Coders Cave — **September 2023 - October 2023**

• Phase 01: Conducted exploratory data analysis on global terrorism and breast cancer classification datasets achieving 98.82% accuracy using regression techniques.

• Phase 02: Attained 97.2% accuracy with random forest classification for email spam detection and achieved higher accuracy with neural networks for speech emotion recognition.

Projects

TickPilot - Market Automation Bot

Fintech project — ***Project Link***

- Developed a concurrent, real-time automated trading system for clients using python's asyncio and Upstox Websocket API for seamless Indian Stock Market data integration.
- Implemented data aggregation converting high-frequency websocket inputs (tickers) into actionable metrics for instant decision-making.
- Enabled automated order placement for Indian equities, requiring only equity name input for user-friendly operation.

StylCheck - Visual Testing at Scale

Built at HackRx 4.0, a *generative AI Hackathon* — ***Project Link***

- Architected and developed a CNN-based AI model to analyze and scale user interface Figma designs for web and mobile applications, achieving an accuracy of 97% in testing scenarios.
- Implemented a Flask-based backend to deploy the model and integrated React.js and Streamlit for a user-friendly frontend interface.
- Delivered an innovative browser extension to enhance accessibility and usability for end-users.

HR Process Automation

AI-based Full Stack project, *Group Project* — ***Project Link***

- Designed and implemented a SQL based database and a Django based server to facilitate seamless communication between an LLMs and a React Application as frontend.
- Leveraged generative AI (Language Models) to create personalized interview questions, enhancing recruitment efficiency and tailoring the process to specific roles.
- Streamlined HR processes, reducing manual intervention and enhancing decision-making efficiency in key operations.

THERA-BOT

Generative AI, *Individual Project* — ***Project link***

- Developed a personalized chatbot system for mental health assistance using Node.js to deploy a Large Language Model (LLM).
- Enhanced user experience through tailored responses, addressing a diverse range of mental health scenarios.

Skills

Programming Languages:
- Python
- C++
- JavaScript
- TypeScript
- SQL
- HTML
- CSS & Tailwind CSS.

Domain wise skills:
- AI-ML
- LLMs and RAGs
- Software Management
- Data Structures and Algorithms
- Object Oriented Programming
- Data Analysis & Visualization
- version control (git).

Frameworks:
- LangGraph
- Fast API
- Tensorflow
- Flask
- React.js
- Next.js
- Node.js
- REST-API.

Additional skills:
- Communication
- Technical Content Writing
- Teamwork.

Achievements

October 2024	**Com-IT-Con 2024:** International Conference	*Proof URL*
October 2023	**Coder's Cave Internship Program**	*Proof URL*
July 2023	**HackRx 4.0 Gen AI Hackathon:** Finalists	*Proof URL*
May 2023	**HACK SRM 4.0 Hackathon:** Best in Blockchain title winner	*Proof URL*
February 2023	**Project Expo'23:** "AI in healthcare" theme	*Proof URL*
April 2021	**Google Kickstart 2021**	*Proof URL*
December 2020	**Microsoft AI Classroom Series**	*Proof URL*

Research Work

COM-IT-CON

Deep learning, Medical Imaging, Cancer Diagnostics

- Authored a research paper on “Bladder Tissue Classification in Multi-Domain Endoscopic Images Using Deep Learning” and presented it at the International Conference on Progressive Computational Intelligence, Information Technology, and Networking (COM-IT-CON 2024) at Manav Rachna International Institute of Research and Studies impacting over 300 attendees.
- Developed a deep learning-based approach using transfer learning with ResNet50 architecture for classification of bladder lesions types.

Proof URL

Position of Responsibility

President

TECHWIZ(Technical Student Community) May 2023 - December 2023

- Appointed as Techwiz’s President, conducted various events, workshops, and competitions around new trends in artificial intelligence, machine learning, and web3.0 technologies.

Technical Team Lead

TECHWIZ(Technical Student Community) October 2022 - April 2023

- Led the Technical team of Techwiz for 7 months, guiding a team of 20, fostering creativity, logic-building, and exploring new technologies, and mentoring for hackathons.

Public Relations Head

Campus Life April 2023 - December 2023

- Contributed to one of the largest clubs at SRMIST, by leading marketing campaigns and managing around 7 inter-college cultural events since my 5th semester.

Technical Member & Content Writer

Google Developer Students Clubs April 2021- April 2022

- Coordinated an ASJ 102 event with over 100 participants, and contributed to mini tech blogs and related content.

Community Lead

CODECREEK(Cross-college Community) June 2021- December 2022

- Established a cross-college community along with 6 more volunteers, sharing technical knowledge and best practices in competitive programming, growing the network to over 250 members nationwide.
